## **Physical Activity Log**

## General recommendations for physical activity.

Gradually build up the amount of activity you do. Aim to do 30-60 minutes of activity each day, which can be done all at once or in several 10-minute sessions. Use a pedometer (an instrument that counts the number of steps you take).

General recommendations are to take 10,000 steps per day.
Gradually work up to this by adding 500 steps to your total each week.
Keep going until you gradually reach 10,000 steps per day.

One Week Physical Activity Log

| DATE      | TYPE OF ACTIVITY | GOAL | MINUTES OF<br>ACTIVITY OR<br>NUMBER OF STEPS | NOTES |
|-----------|------------------|------|--|-------|
| Monday    |                  |      |  |       |
| Tuesday   |                  |      |  |       |
| Wednesday |                  |      |  |       |
| Thursday  |                  |      |  |       |
| Friday    |                  |      |  |       |
| Saturday  |                  |      |  |       |
| Sunday    |                  |      |  |       |
