

EQUIVALENT FRACTIONS

Fraction Word Problems Worksheet

There are 9 cars in the parking lot. 2 cars are parked on the left and the other cars are parked on the right.

1. What fraction of the cars are parked on the right?
2. If 4 cars are white, what fraction of the cars are white?
3. If 2 cars are sportscars, what fraction of the cars are sportscars?

4. If $\frac{5}{9}$ of the cars are minivans, how many minivans are there?

-
5. During lunch time, $\frac{3}{9}$ of the cars left the parking lot. How many cars are left?

Answers

1. $\frac{7}{9}$ of the cars are parked on the right.
2. $\frac{4}{9}$ of the cars are white.
3. $\frac{2}{9}$ of the cars are sportscars.
4. There are 5 minivans.
5. 6 cars are left.
